# COMMUNITY SEED BANK

AgriBusiness – Community Resource Model

# PROBLEM, CUSTOMERS & VALUE PROPOSITION

**Problem**

Farmers may struggle to access locally suitable seeds in small quantities at the right planting time. They may face limited availability, higher sourcing effort and uncertainty about seed quality.

**Target Customers**

- Small and marginal farmers
- Local vegetable growers
- Farmer groups and collectives
- Farmers interested in local/traditional varieties

**Opportunity**

Create a community-managed seed bank that preserves local seed varieties and provides affordable, timely access to farmers.

**Value Proposition**

Local • Affordable • Small Quantity • Seasonal • Community-Based

# Customer Journey and Operating Model

**Key Processes**

**Inventory**

Seed ID, crop & variety

Quantity & batch details

Withdrawal records

**Quality**

Seed inspection

Sorting & packaging

Periodic quality checks

**Storage**

Clean & dry conditions

Properly labelled packets

Regular stock monitoring

**Important Touchpoints**

Registration → Quality Check → Storage → Inventory → Payment → Withdrawal

# Supply Chain and Financial Model

## Supply Chain

1. Farmers / Local Sources
2. Seed Sourcing
3. Quality Check
4. Cleaning & Packaging
5. Storage
6. Inventory Management
7. Member Request
8. Payment & Seed Withdrawal

## Basic Financial Calculation

| Item | Value |
|---|---|
| Storage capacity | 2,000 packets |
| Expected annual withdrawals | 600 packets |
| Member price | ₹40 per packet |
| Handling & packaging cost | ₹18 per packet |
| **Annual revenue** | **600 × ₹40 = ₹24,000** |
| **Annual handling cost** | **600 × ₹18 = ₹10,800** |
| **Contribution after handling** | **₹24,000 – ₹10,800 = ₹13,200** |
| **Contribution per packet** | **₹40 – ₹18 = ₹22** |

*Note: ₹13,200 is contribution after handling and packaging costs, not final net profit.*

# BUSINESS MODEL, SWOT & RISK MANAGEMENT

## Business Model

**Customers**
Farmers and farmer groups

**Value**
Affordable local seed access

**Channels**
Seed bank, farmer groups and village outreach

**Revenue**
₹40 per packet withdrawal

**Key Resources**
Seeds, storage and inventory system

**Key Partners**
Farmers, farmer groups and agricultural experts

## SWOT Analysis

**STRENGTHS**

- Local seed preservation
- Affordable access
- Community participation

**WEAKNESSES**

- Storage requirements
- Quality management
- Seasonal demand

**OPPORTUNITIES**

- Expansion to nearby villages
- Digital inventory system
- Traditional seed preservation

**THREATS**

- Seed contamination
- Poor storage conditions
- Low participation

## Key Risks & Mitigation

**Poor quality**
→ Quality checks

**Storage damage**
→ Proper storage

**Low participation**
→ Awareness programs

**Stock shortage**
→ Seasonal demand forecasting

**Record errors**
→ Digital + physical records

# 90-DAY PILOT-TO-SCALE PLAN

### DAYS 1–30 | BUILD

- Identify farmers
- Register members
- Identify local seed varieties
- Set up storage and inventory system

**Target: 50+ farmer members**

### DAYS 31–60 | PREPARE

- Source and collect seeds
- Conduct quality checks
- Clean, package and label seeds
- Store and record inventory

**Target: 10+ seed varieties + 100% inventory records**

### DAYS 61–90 | PILOT & SCALE

- Start seed withdrawals
- Track payments and stock
- Collect farmer feedback
- Identify high-demand varieties

**Target: Top 3–5 demanded varieties identified**

## Farmer Participation

**1. Seed Contribution & Exchange**
Farmers contribute suitable local seeds to strengthen the community seed pool.

**2. Awareness & Demonstration**
Village meetings, seed fairs, demonstration plots and WhatsApp/SMS updates.

**SUCCESS MEASURES:** 50+ Members | 10+ Varieties | 100% Records | Successful Withdrawals | Farmer Feedback
